

About Us:

Electronica was established in the year 1978 with a focused approach towards providing solutions for the Metal Cutting & Metal Forming industry. It served as Marketing & Sales arm of **Electronica Group** for the products manufactured by our group companies for several decades.

Electronica was one of the first to offer indigenously developed EDM & CNC Wire Cut EDM technology for the Indian industry. With our R & D strength we are continuously developing new products as per the market needs. It also developed relationships with all well-known machine manufacturers across the world and became a truly Global Manufacturing Solution Provider for the Indian engineering industry. Our long-standing experience in the field of machine tools for more than 40 years enabled us to select most appropriate technology for the customers.

Keeping in view the changing market needs and growth requirements, **Electronica** firm was converted into **ELECTRONICA HITECH MACHINE TOOLS PVT LTD** in the year 2011. Electronica HiTech is providing end to end services, right from presales to post sales services across India through its wide spread branch networks and has become a partner in the growth of its valued customers.

Electronica HiTech is committed to create a performance driven work culture based on the foundation of ethical business practices to improve employee and customer satisfaction.
